FIELD TRIP FEES

Our philosophy is to make field trips and other school activities accessible to all students, regardless of their ability to pay, by using transportation funds and other funds to supplement and minimize field trip costs.

- Travel costs within the district - curricular or extracurricular: no charge
- Travel costs outside of the district:
 - o if curricular: no charge
 - o extra-curricular: varies depending on distance travelled and mode of transportation. The school will work with the group going by drawing on transportation funds to keep travel costs down, but students may need to pay for a portion of their travel costs. Students are responsible for food, accommodation, and activity expenses.

Athletics are an important part of school culture which cost money to run. However, we have found that the cost to run each sport varies according to the number of athletes, the number of league games, the number of tournaments, the cost of referees, the equipment required, and the extent of travel. Above is the base amount for athletic fees by sport.

- Long distance tournament with unusually high transportation costs may require additional athlete cost to cover expenses.
- Athletic fees cover entry fees for up to 3 tournament per team. Any additional tournament entry fees must be paid directly by the team and pre-approved by the Athletic Director.
- Students are responsible for food, accommodation, and activity expenses for all tournaments.
